Detector of metals Arc GUARD SPIRIT and thermometre with control access

Product codes:

Reference: PL-ADDTM

Product features:

Product attributes:

Product description:

Metal and contactless temperature detection Arc GUARD SPIRIT Metal Detector and Thermometer with Access Control

The combines metal detection and contactless temperature measurement ( ). 6/12/18 detection heights, people control and counting, LCD screen, remote, light and sound alarm, PC monitoring. Indoor use.

? Métaux? ±0,1ºC? Comptage? Alarme

Detection±0.1ºC
Temperature6/12/18
Heights0.5 s
Real-time

The **GUARD SPIRIT metal detector arch** integrates a high-precision contactless temperature sensor. In addition to measuring users' temperature (±0.1ºC), it handles people passage control and counting, in line with regulations requiring movement logging and compliance with the premises' maximum capacity.

It has **6, 12 or 18 metal detection heights** for precise localisation, an LCD screen and a remote, plus **real-time monitoring (0.5 s)**. The sensor height is adjustable and it triggers a simultaneous light and sound alarm. Monitoring is done via PC. Designed for indoor use, it is ideal for secure access control.

Why choose this product? **? Metal detection**

6/12/18 heights for precise localisation. **? Contactless temperature**

High precision ±0.1ºC, real-time 0.5 s. **? Control and counting**

People passage, light and sound alarm. - **Metal detection:** 6/12/18 heights.
- **Contactless temperature:** ±0.1ºC.
- **Passage control:** people counting.
- **Real-time 0.5 s:** PC monitoring.
- **LCD screen + remote:** simple setup.
- **Light and sound alarm:** reinforced security.

Recommended applications ?('**Airports and stations** — security control.', '**Events and stadiums** — metal detection.', '**Public buildings** — access control.', '**Companies** — counting and security.') Installation guide 1**Position the arch**
Install the arch at the entrance to be controlled (indoor).2**Set the heights**
Select 6, 12 or 18 detection heights.3**Configure**
Set up via the LCD screen or remote.4**Supervise**

Connect the PC for real-time monitoring. Frequently asked questions **Does it detect metal and temperature?**

Yes, metal detection and contactless temperature measurement (±0.1ºC). **How many detection heights?**

6, 12 or 18 heights. **Is it suitable for outdoors?**
It is designed for indoor use. ?
