The **recessed pool housing** is specially designed to hold a PAR56 LED lamp, ensuring its protection and optimal performance in aquatic environments. Made of **high-quality ABS**, it guarantees protection of the bulb's connection terminals and preserves sealing thanks to its IP68 rating.

Each housing includes its **trim ring, plugs and one metre of cable** with a polypropylene insulating sheath, for a safe, durable connection to the mains. For recessed mounting in concrete or polyester pools, it is essential to fill the space with a pool-specific material to ensure the sealing of the assembly. Cut-out dimensions Ø277x130 mm. PAR56 LED lamp not included.
