The **URBAN circular galvanised column** is designed to be installed in any kind of urban environment. Its circular, elegant and modern shape brings a contemporary, refined aesthetic to streets, squares, parks, residential areas and developments. Available in 3 or 4 metres in height, it is made of **galvanised steel**, giving it excellent resistance to corrosion, weather and extreme temperature variations.

Its **Ø60 mm tip** termination makes it compatible with most road luminaires and lanterns on the market. It integrates an inspection door at the approved height as well as a fixing plate for a fuse-holder box. It also includes a 200x200 mm anchor template, making for a safe, durable installation.
