Effect

The **MARMO garden light sphere**, with a diameter of **Ø38 cm**, has an elegant **marble effect** that makes it a decorative object as much as a light source. When on, it spreads a soft, even light; when off, it remains a beautiful ornamental element for the garden.

It has an **E27** socket for an LED bulb (not included), which you can choose according to the desired intensity or colour (including RGB or Smart). Thanks to its **IP65** protection rating, it resists water and dust and can be placed in gardens, on terraces, around pools and in outdoor spaces.
