Product codes:

Reference: IL-KB1903

Product features:

Colour: Black
Measures (mm): 2000mm
Material: Thermoplastic
Certification: CE - RoHS
Warranty: 3 años

Product attributes:

Product description:

2-meter extension cable for solar LED floodlights, allowing the solar panel to be distanced from the light in installations where it is necessary to place the light far from the panel due to the installation configuration or the position of the area with the highest solar incidence.

The cable is compatible with floodlights sold by PremiumLED. For other floodlights from different manufacturers, please consult.

If a greater distance is required, multiple cables can be connected together.

Includes male/female connection with IP65 waterproof protection.
