

Surface-Mounted 48V Magnetic Track 1 Meter

Product codes:

Reference: PL-CMS1M

Product features:

Power source (V): 48V
 Colour: Black
 IP: IP20
 Measures (mm): 50x27x2000mm
 Material: Aluminum + PC
 Driver: No incluido
 Operating temperature: -20°C ~ +40°C
 Certification: CE - RoHS
 Warranty: 3 años

Product attributes:

Product description:

Surface-Mounted Magnetic Track 1 Meter The **surface-mounted magnetic track** of 1 meter is an innovative and versatile solution for installing low-voltage 48V LED lighting systems. Made from high-quality reinforced aluminum and available in black, this track ensures durability and an elegant finish in any environment.

This **magnetic track** is designed to allow for quick and easy installation of LED spotlights, thanks to its magnetic plate that ensures a firm and hassle-free attachment. The LED spotlights are installed directly on the track using a magnet system, allowing for easy and efficient adjustment and repositioning of the lights, adapting to the lighting needs of each space.

The **1-meter magnetic track** includes two end caps and an opaque polycarbonate cover, which conceals the areas of the track where no spotlights are installed, providing a clean and aesthetically pleasing finish once the system is set up.

Installation Options

The magnetic track can be installed in two ways, depending on the needs of your project:

- **Surface Installation:** Ideal for ceilings or walls, this method allows the track to be fixed directly to the desired surface, providing a stable and discreet installation.

- **Suspended Installation:** If you prefer a suspended installation, you can use our hanging accessory for magnetic tracks (sold separately). This option is perfect for creating suspended lighting effects, especially in spaces with high ceilings.

Compatibility and Power Supply

To ensure the proper functioning of your lighting system, it is necessary to use a power supply that matches the load of the LED spotlights you will install on the track. Since power requirements may vary depending on the project, power supplies are sold separately.

Technical Specifications

- **Length:** 1 meter
- **Color:** Black
- **Material:** High-quality reinforced aluminum
- **Voltage:** 48V
- **Dimensions:** 50x27x1000mm
- **Includes:** 2 end caps and opaque polycarbonate cover
- **Installation Options:** Surface-mounted or suspended (suspension accessories sold separately)
