Reinforcement Joint for aluminium profilee in - I

Product codes:

Reference: IL-2838

Product features:

Colour: Plata
Material: Steel
Certification: CE - RoHS
Warranty: 3 años

Product attributes:

Product description:

Joining piece for continuity of wide profiles I-Shaped Reinforcement Joint for Aluminium Profile

An that lets you join your wide aluminium profiles and give them perfect continuity. A superior joining piece, simple to insert, for clean and solid linear runs.

The **I-shaped aluminium reinforcement joint** is a superior joining piece designed for wide profiles. Thanks to its I shape, it lets you join two profiles end to end and give them perfect continuity, with no visible break in the light line.

It is the ideal accessory for **extending a line of profiles** beyond the standard length, while keeping the alignment and rigidity of the assembly. Simple to insert between two sections, it reinforces the join and makes it easy to build long, clean, professional linear installations.

Why choose this product? **? Perfect continuity**

Joins two profiles end to end with no visible break. **? Joint reinforcement**

Keeps the alignment and rigidity of the assembly. **? For wide profiles**
Superior joining piece, simple to insert. Technical specifications Product typeReinforcement joint for aluminium profileShapeI-shapedFunctionJoining and continuity of profilesCompatibilityWide aluminium profilesPositionSuperior joining pieceMaterialAluminium Advantages

- **Perfect continuity:** joins two profiles with no break.
- **Joint reinforcement:** keeps alignment and rigidity.
- **For wide profiles:** superior joining piece.
- **Simple to insert:** quick installation between two sections.
- **Clean finish:** for long linear runs.

Recommended applications ?**Wide profiles** — extending the line.?**Linear installations** — runs beyond the standard length.?**Shops and offices** — continuous linear lighting.?**Custom projects** — joining sections. Installation guide 1**Align the profiles**
Place the two profiles to be joined end to end.2**Insert the joint**
Insert the I-joint into the upper part of both profiles.3**Bring the sections together**
Slide the profiles towards each other until they touch.4**Check the alignment**

Check the continuity and rigidity of the join. Frequently asked questions **What is this piece for?**

To join wide aluminium profiles and give them continuity. **What is its shape?**

An I shape, which fits into the upper part of the profiles. **Which profiles is it compatible with?**
With wide aluminium profiles. ?
