

Double Lateral Joining Bracket for MAGNUM Modules

Product codes:

Reference: 4843

Product features:

Colour: Grey
Material: Aluminum
Certification: CE - RoHS
Warranty: 5 años

Product attributes:

Product description:

Double Lateral Joining Bracket for MAGNUM Modules - Build Custom LED Floodlights Create Powerful and Adaptable LED Floodlights

The **double lateral joining bracket for MAGNUM modules** allows you to combine MAGNUM LED modules to create high-power LED floodlights, from 100W onwards. This bracket is essential for building custom lighting systems tailored to your needs.

Double Assembly and Flexible Combination

Using these brackets, you can join MAGNUM LED modules laterally, creating LED floodlight configurations of different powers and sizes. The double assembly allows for a flexible combination of modules to achieve the desired lighting.

Technical Specifications

- **Product Type:** Double lateral joining bracket for MAGNUM modules
- **Compatibility:** MAGNUM LED modules
- **Application:** Creation of custom LED floodlights
- **Power:** From 100W onwards (depending on the module combination)

Product Advantages

- **Customization:** Allows creating LED floodlights of different powers and sizes.
- **Flexibility:** Combines MAGNUM LED modules flexibly.
- **High Power:** Ideal for building LED floodlights of 100W and above.
- **Double Assembly:** Easy to use and assemble.

Uses and Applications

The **double lateral joining bracket for MAGNUM modules** is ideal for:

- Lighting large outdoor areas.
- Architectural lighting projects.
- Sports facility lighting.
- Creating custom LED floodlights for any application.
