Product description:

Pack of 4 Steel Cables for LED Panel Suspension Suspension Kit for LED Panels

The **Pack of 4 Steel Cables** is designed for the **suspension and hanging of LED panels**, providing a versatile and adjustable solution for high ceiling installations. Each braided steel cable has a maximum height of **80 cm** and can be adjusted in both height and tilt, offering great flexibility when installing LED panels in various locations.

Technical Specifications of the Suspension Kit

- **Maximum adjustable height:** 80 cm
- **Included cables:** 4 braided steel units
- **Compatibility:** Suitable for all LED panel sizes
- **Accessories and screws:** Included for quick and secure installation

Versatile Installation for All Types of LED Panels

This **suspension kit** is suitable for most **LED panels**, allowing the lights to be lowered to a maximum height of 80 cm. The kit includes all **necessary accessories and screws** for quick and easy installation. Its adjustable design also allows the panel tilt to be modified, ensuring optimal lighting in any space.

For **large LED panels**, such as those measuring 60x120 cm, it is recommended to use at least **6 cables** to ensure safe and stable suspended mounting.

Main Features

- Compatible with most LED panels
- Adjustable suspension height and angle
- Includes screws and accessories for easy assembly
- Ideal for high ceilings in offices, shops, and commercial spaces

**** The kit includes 4 cables and their accessories ****
