

Surface Mounting Kit for 60x60cm LED Panels

Product codes:

Reference: PL-TS60X60

Product features:

Colour: White

IP: IP20

Measures (mm): 600x600x68mm

Material: Aluminum

Certification: CE - RoHS

Warranty: 5 años

Product attributes:

Product description:

Surface Mounting Kit for 60x60cm LED Panels This surface mounting kit is designed to accommodate a 600x600mm LED panel and convert it into a surface lighting fixture. Ideal for installing LED panels on ceilings where recessed installation is not possible or there are no removable panels.

The kit, made of white aluminum, offers a practical and aesthetic solution for your lighting needs. Supplied in separate pieces for easy transportation and storage, it assembles easily without the need for special tools.

By transforming LED panels into surface lighting fixtures, this kit expands installation options, allowing you to create well-lit environments in a variety of spaces.

Technical Specifications:

- Material: White Aluminum
- Dimensions: 600x600x68mm
- Mounting: Surface

Installation and Mounting Recommendations:

Mounting the kit is quick and simple. Follow these steps to install the LED panel on the surface:

1. Assemble the three sides of the kit using the provided internal clips.
2. Position the kit in the desired location on the ceiling.
3. Slide the LED panel through the opening in the kit.
4. Position the fourth side to close the aluminum frame.

Recommended Uses and Applications:

- Offices, conference rooms, and workspaces.
- Retail stores, exhibition halls, and commercial spaces.
- Residential environments such as kitchens, living rooms, and bedrooms.
- Educational institutions, healthcare facilities, and other institutional settings.
