Product attributes:

Product description:

60x60cm LED Panel Recessed Frame for plasterboard Enhance the installation of your 60x60cm LED panels with this recessed frame designed for plasterboard ceilings. Crafted from white aluminum, this frame ensures a seamless integration of LED panels into plasterboard ceilings.

The frame is suitable for embedding LED panels into plasterboard ceilings, with a recommended ceiling cutout of 65x65cm. It includes fixing clips against the plasterboard and is designed to be flush with the ceiling, providing a clean and professional finish.

Supplied disassembled, the recessed frame requires assembly and is compatible with any 60x60cm LED panel model, whether slim or backlight.

Technical Specifications:

- Material: White aluminum
- Recommended Ceiling Cutout: 65x65cm
- Assembly: Required
- Compatibility: Fits any 60x60cm LED panel model
- Mounting: Flush with ceiling

Installation and Mounting Recommendations:

When installing the recessed frame, ensure the plasterboard ceiling is sturdy and capable of supporting the frame and LED panel. Follow the provided assembly instructions carefully for proper installation.

Recommended Uses and Applications:

- Offices, conference rooms, and meeting spaces.
- Retail stores, showrooms, and commercial spaces.
- Residential environments such as kitchens, living rooms, and bedrooms.
- Schools, hospitals, and healthcare facilities.
