Connector transparent with cable for LED strip COB / SMD 10mm IP20

Product codes:

Reference: IL-CN42109

Product features:

IP: IP20
Material: PC
Certification: CE - RoHS
Warranty: 3 años

Product attributes:

Product description:

Quick solderless connector for LED strips Solderless Transparent Connector with Cable for COB / SMD LED Strip 10 mm IP20

The for COB and SMD IP20 LED strips (10 mm PCB) lets you make connections without soldering, simply by tightening the clips. Compact 15x4x10 mm dimensions, it fits into most aluminium profiles. Includes a 15 cm starter cable for connection to the power supply or controller.

Compatibility

The **solderless transparent connector** is designed for non-waterproof COB and SMD IP20 LED strips with a **10 mm** wide PCB. The IP20 quick connector lets you make connections on LED strips **without any soldering**, simply by tightening the connector's clips on the sides.

Its compact **15x4x10 mm** dimensions let it fit into most commercial aluminium profiles for LED strips. Transparent, it stays discreet once installed. Includes a 15 cm starter cable for connection to the power supply or controller. It is the ideal accessory for joining two strip sections or powering a strip without a soldering tool.

Why choose this product? **? Solderless**

Quick connection by tightening the clips, no soldering tool. **? 10 mm PCB**

For non-waterproof COB and SMD IP20 LED strips. **? Transparent and compact**
15x4x10 mm, fits into most aluminium profiles. Technical specifications Product typeSolderless transparent connectorCompatibilityCOB / SMD IP20 LED strips, 10 mm PCBConnectionClips (solderless)Dimensions15x4x10 mmProtectionIP20Included15 cm starter cable Advantages

- **Solderless:** quick clip connection.
- **10 mm PCB:** COB and SMD IP20 strips.
- **Transparent:** discreet once installed.
- **Compact 15x4x10 mm:** compatible with alu profiles.
- **15 cm cable included:** connection to the supply.

Recommended applications ?**COB / SMD LED strips** — solderless connection.?**Aluminium profiles** — compact integration.?**Clean installations** — transparent connector.?**Repairs** — quick section joining. Installation guide 1**Switch off the power**
Cut the supply before handling.2**Prepare the strip**
Cut the strip at the mark; the PCB must be 10 mm.3**Insert into the connector**
Insert the strip and tighten the clips.4**Check**

Restore power and check the lighting. Frequently asked questions **Is soldering required?**

No, the connection is made simply by tightening the clips. **What PCB width?**

For COB / SMD LED strips with a 10 mm PCB. **Does it fit into a profile?**
Yes, its compact size suits most aluminium profiles. ?
