Mini touch dimmer for 12/24V LED strip in profileee

Product codes:

Reference: IL-2680-TC

Product features:

Power source (V): 12/24V-DC
IP: IP20
Material: Aluminum
Operating temperature: -20ºC ~ +55ºC
Lifespan: 50.000h
Certification: CE - RoHS
Warranty: 3 años

Product attributes:

Product description:

Compact touch dimmer switch for profiles Mini Touch Dimmer for 12/24V LED Strip to Integrate into Aluminium Profile

The for LED strips is a switch with a dimming function to turn on, turn off and gradually adjust the intensity of LED strips installed in . Compact format, it integrates into the profile for discreet control by simply touching the diffuser.

The **mini touch dimmer for 12/24V LED strips** is a switch with a dimming function designed to turn on, turn off and gradually adjust the light intensity of LED strips installed inside aluminium profiles. Thanks to its compact format, it easily integrates into the profile and allows discreet, practical, modern control of the lighting.

This device lets you control the lighting by **simply touching the profile's diffuser**. It not only turns the LED strip on and off, but also adjusts the light intensity gradually, to create the desired atmosphere. Compatible with 12V and 24V LED strips, it is the ideal solution for elegant, functional linear lighting.

Why choose this product? **? Touch control**

On, off and dimming by touching the diffuser. **? Gradual dimming**

Adjust the intensity to create the desired atmosphere. **? Compact, 12/24V**
Integrates into the profile, discreet, modern control. Technical specifications Product typeMini touch dimmer for LED stripVoltage12V / 24VControlTouch (on the profile's diffuser)FunctionsOn, off, gradual dimmingIntegrationInto aluminium profileFormatCompact Advantages

- **Touch control:** touch on the diffuser.
- **Gradual dimming:** adjustable intensity.
- **12/24V:** compatible LED strips.
- **Compact:** integrates into the profile.
- **Discreet and modern:** practical control.

Recommended applications ?**Aluminium profiles** — integrated control.?**Kitchens and furniture** — touch lighting.?**Bedrooms and living rooms** — adjustable atmospheres.?**Shops** — discreet control. Installation guide 1**Switch off the power**
Cut the supply before installation.2**Integrate into the profile**
Place the dimmer in the aluminium profile.3**Connect the strip**
Connect the 12/24V LED strip and the supply.4**Test the touch**

Check the switching and dimming by touch. Frequently asked questions **How is it controlled?**

By simply touching the profile's diffuser. **Which voltages does it accept?**

12V and 24V LED strips. **Can it dim the intensity?**
Yes, it adjusts the intensity gradually. ?
